Return

In many ways, this game reminds me of Zombies Ate My Neighbors, but this is clearly not ZAMN.

You have to run from room to room taking out all kinds of wacky monsters that are trying to destroy the house while you round up survivors. If they destroy too much of it, you lose. If you die, you lose. Pretty straightforward, but it's surprisingly hard.. The very best arkanoid "reboot" known to me. There are so many very fun and new mechanics added to the game. You can manipulate your ball with sucking and blowing air (finally cutting those hours of trying to hit the last block to a very minimum). You can release more balls to clear the level faster and gather more points but it will be much harder to keep them up. The music in this game is just awesome. Graphics are fantastic, extreme crisp borders, perfect control over the pad. If you like arkanoid you HAVE TO BUY THIS!.. Very shallow, not much content, feels like some short project thrown together. Developer has abandoned the project as well, and multiplayer is dead.. Nice clothes, awesome paint, the game doesnt drop trading cards

not a bad minecraft skyblock sim at low settings. Game is good.. Very fun and entertaining platformer pixel game with simplistic controls. You only have the ability to change the direction of gravity mostly but it results in very interesting puzzles from time to time. Took me about three hours to complete, which isn't bad. It also seems to have components of Metroidvania surprisingly, and was generally amusing to play from start to finish.

4/5. Great game, great show! The game itself is very detailed in style and i like the art style (although i prefer the actual show's artwork) but other than that, I love the storyline and game itself!

But, in my opinion, it isn't worth 20\$, most likely 10\$ at most. I haven't played it a lot, but I really don't want to. Details and so on are fine, but it's annoying - can't explain why in english.

If you want to try farming games, go for Farming Simulator 15.
